

**Scott Epstein** is a Planning and Rules Manager who oversees the Air Quality Assessment Group and the Air Toxics Hot Spots Program (AB2588) at the South Coast Air Quality Management District. Scott specializes in the analysis, interpretation, and dissemination of air quality and meteorological data to help the public reduce their exposure to poor air quality. Scott joined the South Coast AQMD in 2014 after a postdoc in Atmospheric Chemistry at the University of California, Irvine. He has a Ph.D. in Chemical Engineering from the Center for Atmospheric Particle Studies at Carnegie Mellon University
