

SALTON SEA SUMMIT

UC Riverside, Palm Desert | October 17-18, 2019

SALTON SEA
Summit

Key take-aways

- California has a short-term plan & >\$350 million
- Secretary Crowfoot & the governor are committed to action – now have political will
- What we need now are results – and projects in the ground.
 - Should not mean public needs to choose between projects and ongoing evaluations/research – it's too important of an issue to not generate support for both
- Some want answers on an import plan

More take-aways

- There are vibrant local communities that need to be an integral part of planning and long-term vision for the Sea.
- Despite decades of research, we continue to learn more about the changing Salton Sea
- The community wants more transparency & information

Next steps

- More & better collaboration between agencies, communities, & academia
- More monitoring & data sharing of
 - Air quality (and constituents & wind direction)
 - Water quality and quantity
 - Invertebrates & fish
- More frequent SSMP updates & interaction

Next steps

- Fill out email survey – what did you like? What could we do better?
- Visit www.saltonseasummit.org for presentations & links to videos
- Watch for new state website – www.saltonseaca.gov
- Stay involved!
